FBI Releases Statistics from Law Enforcement Suicide Data Collection

In 2022, the Law Enforcement Suicide Data Collection (LESDC) completed its first year of compiling statistics on the deaths by suicide and attempted suicides of current and former law enforcement officers in accordance with the Law Enforcement Suicide Data Collection Act. Law enforcement, corrections, telecommunications, and judicial system agencies provide data to the collection.

Threat Assessment and Threat Management (TATM) — A Model Critical to Terrorism Prevention

The TATM Model is a proactive, prevention-based approach for recognizing, evaluating, assessing, and managing threatening or concerning behavior before an act of violence has occurred, including terrorism. Implementing a TATM system can aid public safety personnel in dealing with threatening or concerning behaviors that might be indicative of future acts of targeted violence, including terrorism. The keys to mitigating a threat are early identification of concerning or threatening behaviors and intervention by a multidisciplinary team (MDT) that can direct, document, and manage the threat assessment and response process.
